Modern Library Association (MLA) Style for Citing Sources

In a report, you should cite the sources for quotations, facts that are not common knowledge, and ideas that are not your own. Sources can be cited by using Internal Citations along with a Bibliography or Works Cited section at the end of your paper.

**Internal Citations:** An internal citation appears in parentheses. It includes the author’s last name and the page number on which the information appears. The citation appears right before the period at the end of the sentence(s) in which you used the material. If several sentences in a row contain information from the same source, the citation only needs to appear at the end of the last sentence.

“The duke of Lancaster in 1888 . . . controlled more than 163,000 acres of British countryside” (Pool 163).

**Bibliography or Works Cited:**
